

CIRED 2024 Vienna Workshop

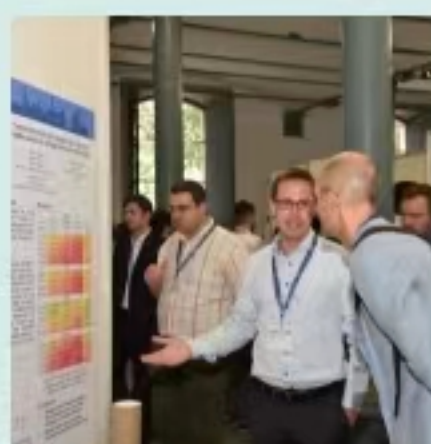

Increasing Distribution Network Hosting Capacity

 19 – 20 June 2024 | Austria Center | Vienna | Austria

 Call for Abstracts deadline: 8 December 2023

Have you started writing your abstract for the CIRED 2024 Vienna Workshop?

CIRED is a must for all electricity distribution professionals, and being accepted for the programme marks you out as someone with high quality work that will be of interest to the profession.

[Learn about submitting an abstract >](#)

You'll also raise your profile, reach and influence through multiple publication streams and opportunities for citation, including IET Inspec, IEEE Xplore, Ei Compendex, and Scopus.

[Make a start on your abstract submission >](#)

Take a detailed look at the technical scope

Theme 1 – Enhancing hosting capacity through new methods for network planning and design

Preferred topics in Theme 1 include:

- Planning methodologies for an all-electric society
- Planning for increasing hosting capacity, also considering multi-energy systems
- Forecasting (short-term, long-term, geospatial)
- Uncertainty and risk management

Theme 2 – Network operation and control supporting increased hosting capacity

Preferred topics in Theme 2 include:

- Distribution system supervision and control
- Technical interfaces between system actors
- Distribution system state estimation
- System stability and ability of system restoration

Theme 3 – Enabling increased hosting capacity through regulation, business models and customer involvement

Preferred topics in Theme 3 include:

- Practical experiences of smart grid regulation, flexibility markets, dynamic network tariffs, flexible connection agreements, "go-to" areas and others
- Regulation encouraging the usage of flexibility mechanisms as an alternative to network reinforcements
- New business models and tariffs supporting demand side flexibility and sector coupling
- Disruptive technologies and cross-industry applications, e.g. using artificial intelligence
